### **3.2 Project Background**

#### **3.2.1 About OCAC**

The Department of Electronics & Information Technology is the nodal department for Government of Odisha in the matters of IT, ITES, ESDM, Semiconductors and Communication. The department plays a vital role in formulating and implementing policy matters in Information Technology, ITES, Electronics and Telecom; promotion of Odisha as an ultimate ICT destination for investment and facilitating ICT industries; assisting other department for effective e-Governance and capacity building; Promotion of ICT based education in the State.

Odisha Computer Application Centre (OCAC), the Technical Directorate of Electronics & Information Technology Department, Government of Odisha, has evolved through years as a pioneer deploying in IT and e-Governance solutions. It has contributed significantly to the steady growth of IT in the state. It helps IT to reach the common citizen so as to narrow down the Digital Divide and widespread applications of IT in establishing a system where the citizens are receiving good governance in addition to ensuring speed of decisions from a transparent Government through an effective e- Governance System.

#### **3.2.2 Profile of O-Chip Program**

India already has a semiconductor design landscape. However, this design landscape is dominated by the captive centres of world's leading semiconductor companies. Most of the top 25 global semiconductor companies have their captive design centers in India. While this has developed India into a vibrant place in the global semiconductor ecosystem, it has also created a false sense of ecosystem maturity. In reality, all the captive centres are creating IPs/ Products for their parent company outside of India. Presently, there are very few active Indian semiconductor companies and most of them struggle to compete in the world market. Capex and opex requirements for fabless semiconductor companies can run somewhere between 2 million USD to 10 million USD, thereby making the entry barriers to do a fabless startup almost insurmountable.

The proposed Odisha Semiconductor Fab and Fabless Innovation and Acceleration Program, known as the O-Chip Program, is an attempt to institutionally address the difficulties experienced by the Indian fabless ecosystem. It aims to catalyze chip design and manufacturing in Odisha. Created to address the challenges faced by the Indian fabless ecosystem, the O-Chip Program will offer state-of-the-art infrastructure, operational solutions, mentorship, industry connections, and access to essential EDA tools and IPs. With an investment ranging from INR 150 – 200 Cr, this program will foster an ecosystem supporting research, design, testing, and manufacturing.

For ensuring the effective implementation of the O-Chip Program, the Government of Odisha intends to establish a Special Purpose Vehicle (SPV). This SPV will be a joint venture between the Odisha Computer Application Centre (OCAC) and an India registered and internationally renowned company with expertise in all facets of semiconductor-related activities, such as design/

manufacturing/marketing. The partner company will bring domain expertise crucial for project implementation and operation to achieve desired outcomes
