7. Criteria for Evaluation

Tenders for this contract will be assessed using the **Least Cost Selection (LCS i.e., L1) system**, where the bidder with the lowest total quote (the lowest amount in the Grand Total column of the commercial bid) will be awarded the contract. All bids will initially be evaluated based on the Pre-Qualification Criteria and Technical Qualification Criteria.

To make this determination, the Evaluation Committee will examine and compare the technical aspects of the proposals based on the information provided by the bidders, considering the following factors:

- a) Overall completeness and compliance with the requirement
- b) Proposed technical compliance sheet, quoted product data sheet, brochures & work plan that the bidder will achieve the performance standards within the time frame described in RFP documents.
- c) Any other relevant factors, if any, listed in the RFP document or the OCAC deems necessary or prudent to take into consideration.

To streamline the evaluation of technical proposals, the parameters outlined in the technical specifications indicate the significance of the evaluation criteria. Only bidders who meet these technical evaluation criteria by scoring the required marks will be considered for further evaluation of their financial bids. Technical bids that do not comply with the specifications requested in the Request for Proposals (RFP) will be deemed technically non-responsive and will be excluded from the financial bid opening process.
